

Rayees Ahmad Lone

Cloud Security Engineer | DevSecOps | Cybersecurity
xahidlone88@gmail.com

PROFILE

Cloud Security Engineer focused on AWS, Azure, DevSecOps, infrastructure security, automation, monitoring and resilient cloud architecture. I combine security-first design with practical engineering and repeatable automation.

CORE TECHNOLOGIES

AWS • Azure • IAM • Zero Trust • Terraform • Docker • Kubernetes • CI/CD • SIEM • Python • PowerShell • Network Security • Incident Response • Backup & Disaster Recovery

SELECTED PROJECTS

AWS Cloud Security Architecture

IAM, least privilege, VPC segmentation, logging, encryption and threat monitoring.

Azure Cloud Security Architecture

Entra ID, RBAC, policy, network controls and cloud security monitoring.

DevSecOps CI/CD Pipeline

SAST, SCA, secrets detection, IaC validation and secure deployment gates.

Terraform Security Automation

Repeatable cloud provisioning with secure defaults and policy controls.

Container & Kubernetes Security

Image scanning, RBAC, secrets hygiene and workload isolation.

Cloud SIEM & Threat Monitoring

Centralized security telemetry, detection, alerting and investigation.

Automated Vulnerability Scanning

Repeatable infrastructure, dependency and container security scanning.

Incident Response & Cloud Forensics

Investigation, evidence collection, containment and response workflows.

Secure Network & VPN Architecture

Segmentation, firewall policy and controlled remote administration.

Cloud Backup & Disaster Recovery

Retention, verification and tested recovery workflows.
